

Quick Guide – How to Contribute

This is **easier than working on Google Docs**:

🔗 You only edit your own file, press save, and push it to GitHub. No messy copy-paste, no version conflicts.

1. Files

Each part of the report is in its own file:

- `0_title_page.md`
 - `1_introduction.md`
 - `2_background.md`
 - `3_methodology.md`
 - `4_solution.md`
 - `5_discussion.md`
 - `6_references.md`
 - `appendix.md`
-

2. How to Edit

1. Open **VS Code**.
 2. Click the file with your section (e.g., `2_background.md`).
 3. Write your content under the headings.
 - `##` = section title
 - `###` = subsection
 - `-` = bullet point
 - `**bold**` = bold text
-

3. Preview

- Press `Ctrl+Shift+V` (Windows) or `Cmd+Shift+V` (Mac) to preview.
 - What you see is how it will look in the final report.
-

4. Save & Upload

1. Just **save** your file in VS Code.
 2. Upload (commit/push) changes to our shared repo:
🔗 <https://github.com/erdenezaya/bi-group-project>
-

5. Building the Report

- The editor will run the script (`compile_report.py`).
 - It merges all sections into one (`report_merged.md`) and exports a PDF.
 - You don't need to worry about merging — just edit your own file.
-

☒ That's it. Much simpler than Google Docs: no version clashes, no overwriting, and everything stays organised.
